Tabular data details:

Total number of observations	278747
Total number of files	5
Total number of features	19
Base format of the file	.csv
Size of the data	31 MB

Note: Replicate same table with file name if you have more than one file.

Proposed Approach:
"df_total" is a dataframe is created by merging mentioned 5 dataframes :
- The days which is not a holiday, has "-" value in "Holiday" column
- After Merging if any record has at least 1 NaN value, the whole record is dropped. it means we do not have enough information of that trip
